Zsolt Szücs

Dipl.-Ing. Mechanical Engineering / Aerospace | Technical / Program Project Manager

München | zsolt.szucs@gmail.com

German & Hungarian nationality | German C2 · English C1+ (negotiating)

PROFESSIONAL PROFILE

Technical and program-style project leader with 20+ years in high-tech product development (concept → series) at automotive Tier-1 suppliers for premium OEMs. Dipl.-Ing. Mechanical Engineering / Aerospace (TU Budapest, very good)—Diplom equivalent-level qualification, not an Anglo-Saxon Master's by title. Proven ownership of schedule, budget, risk and change; cross-functional teams (design, FEM/CAE, prototyping, testing, suppliers); design reviews; OEM interfaces and executive reporting. Seeking to transfer this full-lifecycle program execution skill set to aerospace client programs (not 10+ years pure aerospace/avionics PM).

CORE COMPETENCIES

- Program / project leadership: full lifecycle concept–prototype–series; schedule, budget, quality, risk & change management; executive status reporting
- Cross-functional coordination: design, FEM/CAE, test, prototype shop, suppliers, OEM customers; design reviews; multicultural teams of 10–20
- Structures & FEM: Hyperworks/Hypermesh, Optistruct, Radioss, Abaqus, LS-Dyna; composite structural calculation; MBS (Adams)
- CAD / PDM: CATIA V5 (expert), NX/Creo basics; Windchill, Teamcenter; ENOVIA VPM (Airbus A380 training)
- Methods: DFMEA, DVP&R, design-for-manufacture, supplier management, BOM/drawing release
- OEM / network: BMW, Porsche, MB/AMG, Audi, JLR, Ferrari, Bugatti, Lotus; aerospace contacts Airbus / Rolls-Royce
- Languages: German C2, English C1+ negotiating level, Hungarian native; Industrie 4.0 certificate (bfz)

PROFESSIONAL EXPERIENCE

Technical Project Manager / Product Owner – Development

paragon movasys GmbH, Landsberg am Lech | 01/2022 – present | also 01/2018 – 03/2020 (Sub-Project Lead)

- Lead customer programs for active aerodynamics and interior systems from concept to series (e.g. Mercedes-Benz VAN.AE folding tables; spoilers / roof systems).
- Technical leadership of design, prototype shop, testing and FEM/MBS; BOM, drawing release, feasibility, supplier alignment.
- DFMEA, DVP&R, change management; direct OEM counterpart; status reporting to management; budget & schedule ownership.
- Acquired new customers/suppliers; collaboration with Bugatti, Lotus, Mercedes-Benz engineering.

Technical Project Manager – Electromechanics, Battery Systems (contract)

Dynamic Engineering GmbH → F. Dräxlmaier, Munich | 04/2020 – 10/2020

- Led electromechanical development team (design, prototypes, test, calculation); OEM interface, DFMEA, DVP, change control.
- Assignment ended during probation due to COVID-19 program impact.

Sub-Project Lead – Development (freelance)

SMP-Peguform, Bötzingen | 05/2017 – 12/2017

- Series development of Porsche J1/Taycan center console; led design, process development, test and CAE.
- Budget & schedule ownership; direct Porsche OEM interface; resolved conflicting targets in international setting.

Technical Project Lead – Development (freelance)

Dräxlmaier Group, Vilsbiburg | 01/2015 – 05/2017

- Series development of Land Rover Discovery center console; product & manufacturing concepts; maturity management.
- Led design, process, prototype, testing and CAE; JLR OEM interface (Birmingham); DFMEA, DVP&R, AIMS change.

Component Owner / Design Team Lead (freelance)

Webasto AG, Stockdorf | 11/2012 – 12/2014

- Concept & series work: BMW G12 panoramic roof to SOP; movable rear spoiler BMW G32; electric wind deflector BMW G14; Porsche front diffuser concepts.
- PDM: ENOVIA VPM, Windchill; design-for-manufacture of assemblies.

Development Engineer / Component Owner (freelance)

HS Genion GmbH (Webasto), Munich | 09/2004 – 10/2012

- Concept-to-series ownership: Porsche Panamera / 981/991 spoiler systems; automatic wind deflector Porsche 991; cooling-air management.
- Introduced advanced MBS methods (Adams optimization, flexible bodies, Matlab/Simulink co-simulation); patents (air-guiding device).

Earlier roles

Zeuna Stärker (exhaust, VW/Daimler) · GTI Stuttgart / Webasto (MINI R52 soft-top, Lamborghini BIW, Smart doors) · Audi Hungaria (TT production engineering, 1997–2000)

- OEM/Tier-1 engineering across body, soft-tops and exhaust; on-site series support Birmingham (MINI); production engineering at Audi Gyor.

EDUCATION & FURTHER TRAINING

Dipl.-Ing. Mechanical Engineering – Aerospace, Budapest University of Technology (1992–1997). Thesis: mathematical model of an aircraft gas turbine. Overall grade: very good. Doctoral studies (turbomachinery / control, incomplete, 1997–1999). Internship: aircraft engines, Moscow (1996).

Further training: Industrie 4.0 specialist, CAD/CAM focus (bfz Munich, 2021) · FEM Altair Hyperworks suite · JLR Failure Mode Avoidance / D-FMEA · Porsche methodology · ENOVIA VPM Airbus A380 · CATIA V4/V5, Windchill, NX, Creo

SELECTED PROJECTS (CONCEPT → SERIES)

AMG rear spoiler (B232/C190) · Porsche J1/Taycan center console · Land Rover Discovery center console · BMW G12 panoramic roof · Porsche Panamera / 981/991 spoilers · Porsche 991 automatic wind deflector · MINI R52 soft-top · Audi TT production support
